

Part 3 test

Agreeing lesson goals (have these questions in a clip board with you on your part 3 test)

Questions to use when the goal (or goals) is practicing / recapping over something previously learnt. The pupil is finding something challenging (struggling with something) and would like help to improve this on today's lesson:

- What would you like to achieve on today's lesson?
(listen to the pupil's reply)
- On a scale of 1 – 10 how confident do you feel at?
(use the same question when reflecting at the end of the lesson to measure improvement)
- What is it about this that you're struggling with?
(Try and narrow the goal and get as specific as possible)
- Would you like me to help you on today's lesson?
- Are you happy to agree this as a goal for today's lesson?
- Can you think of anything else where there's room for improvement and you'd like a bit more practice?
(Note: it's a good idea to have a back-up goal in case the first goal gets achieved quickly and you still have 10-15 minutes available)

Back up goal:

.....

Questions to use when the goal (or goals) is learning something new / practicing something for the first time:

- What would you like to achieve on today's lesson?
(listen to the pupil's reply)
- We can do that. Before fully agreeing on this, is there anything else you can think of where there's room for improvement and you'd like a bit more practice?
(The pupil will answer 'no' because they want to do what they originally said. At least you have demonstrated being client-centred and exploring the pupil's needs)
- Let's agree today's goal (or goals) as
Are you happy with this as the goal of today's lesson?

Note: Make it clear that the pupil had a briefing on this 30 minutes ago and is therefore fully informed about what they will be practicing on today's lesson.

Hint: on your part 3 test discuss the person (examiner) sat in the rear of the car as a learning opportunity. This is a new experience, the pupil hasn't driven with a passenger sat in the rear previously. Discuss it is the drivers responsibility for the safety of the car and of the passengers safety. Make sure the passenger is wearing their seatbelt, and their head restraint is correctly adjusted. Discuss the risks of the passenger not wearing the seat belt or adjusting the head restraint:

- In a crash they would be thrown forwards and injure themselves and the driver
- They will sustain a neck injury if the head restraint isn't correctly adjusted
